SPRING LAKE LIFT STATION IMPROVEMENTS

Dear Residents:

The City of Santa Rosa is finalizing construction plans to repair ground settlement at the Spring Lake Lift Station. This project will remove several feet of soil and replace it with a suitable compacted granular fill. Upgrades to the lift station will include new controls, backup generator, lighting, fencing, and a new concrete pad for the station with asphalt concrete pavement on the remainder of the site. The project is anticipated to take **approximately three months** with an estimated start date of May, 2017 (see reverse for project limits).

Completion of this project is vital to the integrity of our community infrastructure. This sewer pump station serves your neighborhood, so it is vitally important that it continues to serve you safely and reliably in the future.

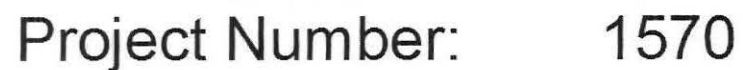

Though temporary impacts to your neighborhood are inevitable, our goal is to improve our community infrastructure without creating any more disturbance than necessary. Please feel free to contact me at (707) 543-4519 (or e-mail at awilt@srcity.org), if you have any questions or concerns.

We will update you with another letter approximately two weeks prior to the start of construction. In addition to written communications like this, the City has a special website where you can track the progress of this project. Simply go to www.srcity.org/CIP, view the map, and click on the blue map pin that corresponds to this project. You can also view the list of all Capital Improvement Program projects and find this project under Project ID No: 01570.

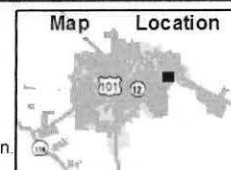

Sincerely,

A handwritten signature in blue ink, appearing to read "Andrew Wilt", is written over a horizontal line.

ANDREW WILT
Associate Civil Engineer
