SPRING LAKE LIFT STATION IMPROVEMENTS

Dear Residents:

The City of Santa Rosa is contracting with Gregory Equipment Inc. for construction of the above referenced project. Construction is tentatively scheduled to begin in July 2017 and last approximately 20 weeks. Construction will include repairing ground settlement at the site, upgrading; station controls, backup generator, lighting and site pavement (see reverse for Project Limits).

Completion of this project is vital to the integrity of our community infrastructure. Some of the benefits this project will bring to your neighborhood include:

- Upgrades to your local sewer lift station facilities will help improve your neighborhood's sewer system performance.
- Improved sewer facilities will reduce the frequency of preventative maintenance and the potential for repairs, both of which will result in cost reductions.

Though temporary impacts to your neighborhood are inevitable, our goal is to improve our community infrastructure without creating any more disturbance than necessary. If you have any questions or concerns, please contact the Construction Manager or me at the following numbers:

Ben Bryant, Construction Manager
Andrew Wilt, City Project Manager

(707) 576-1322 Office
(707) 543-4519 Office

If you are aware of other occupants on your property who may not receive this notice, please share this notice with them or contact me with their address and I will notify them directly.

In addition to written communications like this, the City has a special website where you can track the progress of this project. Simply go to www.srcity.org/CIP, view the map, and click on the blue map pin that corresponds to this project. You can also view the list of all Capital Improvement Program projects and find this project under Project ID No: 01570.

The City values your feedback. Please tell us how we did in your neighborhood by completing a post-construction survey. The survey will be delivered by a City representative to homes and businesses in close proximity to the construction site upon completion of this project. You may also access the survey online at www.srcity.org/construction.

Sincerely,

ANDREW WILT
Associate Civil Engineer
