**MONTGOMERY DR WATER REPLACEMENT - MISSION BLVD TO JACKSON DR  
Project ID No: 01675**

Dear Residents:

The City of Santa Rosa is finalizing construction plans to replace the existing 4" & 6" Water main between Mission Blvd. and Jackson Dr. with a single 8" Water main. As part of this project, the City will also be replacing 3 Fire Hydrants and the existing water services; and relocating the Pressure relief valve to a location that will allow for easier access for maintenance. Two cross drain culverts at Jackson Drive and a section of storm drain located near Mission Blvd will be also be replaced.

The project is anticipated to take 12-16 weeks, with an estimated start date of February 2020 (see page 2 for Project Limits).

Completion of this project is vital to the integrity of our community infrastructure. Some of the benefits this project will bring to your neighborhood include:

- Upgraded pipe materials to help improve the water system's performance.
- New water lines to help protect your home and property by improving water flows and pressure to fire hydrants.
- New storm drains to help protect your home and property by improving water flows from storm runoff.

Though temporary impacts to your neighborhood are inevitable, our goal is to improve our community infrastructure without creating any more disturbance than necessary. The Contractor will be advised that daily and weekly activities such as mail delivery and garbage service must continue during the project. Please feel free to contact me at 707-543-3862 (or e-mail at [dfradelizio@srcity.org](mailto:dfradelizio@srcity.org)) if you have any questions or concerns.

We will update you with another letter approximately two weeks prior to the start of construction. In addition to written communications like this, the City has created a special website where you can track the progress of this project. Simply go to [www.srcity.org/CIP](http://www.srcity.org/CIP), view the map, and click on the blue map pin that corresponds to this project. You can also view the list of all Capital Improvement Program projects and find this project under Project ID No: 01675.

Sincerely,

DAVID FRADELIZIO  
Associate Civil Engineer
