## RESERVOIR (R7) ROAD ACCESS STABILIZATION REPAIRS

Dear Residents:

The City of Santa Rosa wants to inform you of a revision to the construction plan for the above referenced project that will temporarily impact your neighborhood. The revision will install an underground plate pile system to stabilize the slopes above the R7 access road as an alternate to constructing a concrete block retaining wall system. Construction is scheduled to occur late October / early November 2020.

Completion of this project is vital to the integrity of our community infrastructure. Some of the benefits the revised project will bring to your neighborhood include:

- Preserving the natural appearance of the hillside by eliminating the retaining wall structure.
- Improved erosion control with the installation of the underground plate pile system.
- Upgrading the existing storm drain system for a portion of Yerba Buena Road.
- Maintaining access to a vital piece of the City's potable water infrastructure.

Although temporary impacts to the area are inevitable, our goal is to improve our community infrastructure without creating any more disturbance than necessary. In addition to the benefits listed above, the plan revision is designed to shorten the construction period, which will minimize work during the rainy season and reduce construction costs. There will be noise generated during installation of the plate piles. However, installation of the plate piles is expected to take less than a week. If you have special needs regarding access, or if you have any questions or concerns, please contact me at (707) 543-3869 office or (707) 494-5286 cell (or e-mail at [ceverson@srcity.org](mailto:ceverson@srcity.org)).

In addition to written communications like this, the City has a website where you can track the progress of this project. Go to [www.srcity.org/CIP](http://www.srcity.org/CIP), view the map, and click on the blue map pin that corresponds to this project. You can also view the list of all Capital Improvement Program projects and find this project under Project ID No: 01801.

The City values your feedback. Please tell us how we did by completing a post-construction survey. The survey will be delivered to homes and businesses in close proximity to the construction site upon completion of this project. You may also access the survey online at [www.srcity.org/construction](http://www.srcity.org/construction).

Sincerely,

  
Cheryl Everson (Oct 22, 2020 13:49 PDT)
