REMOVE SERVICES FROM S1 FEED PROJECT

Dear Residents:

The City of Santa Rosa is finalizing construction plans for the above referenced project that will make improvements to the water system on Fountaingrove Parkway. This project will install approximately 500 feet of new 8 inch water main in Fountaingrove Parkway between Mendocino Avenue and Round Barn Boulevard to provide a new water service to the Extended Stay America Hotel. The exact limits of the project are shown on the map on the reverse side of this letter. The project is anticipated to start construction in the fall of 2016.

Completion of this project is vital to the integrity of our community infrastructure. Some of the benefits this project will bring to your neighborhood include:

- Improving water system's performance by upgrading pipe materials
- Improving fire suppression flows and pressures to fire hydrants
- Improving our water systems ability to meet community demands

Though temporary impacts to your neighborhood are inevitable, our goal is to improve your water service without creating any more disturbance than necessary. Please feel free to contact me now or at any time during the duration of the project at (707) 543-4528 (or e-mail at FBrowne@srcity.org) with any questions or concerns.

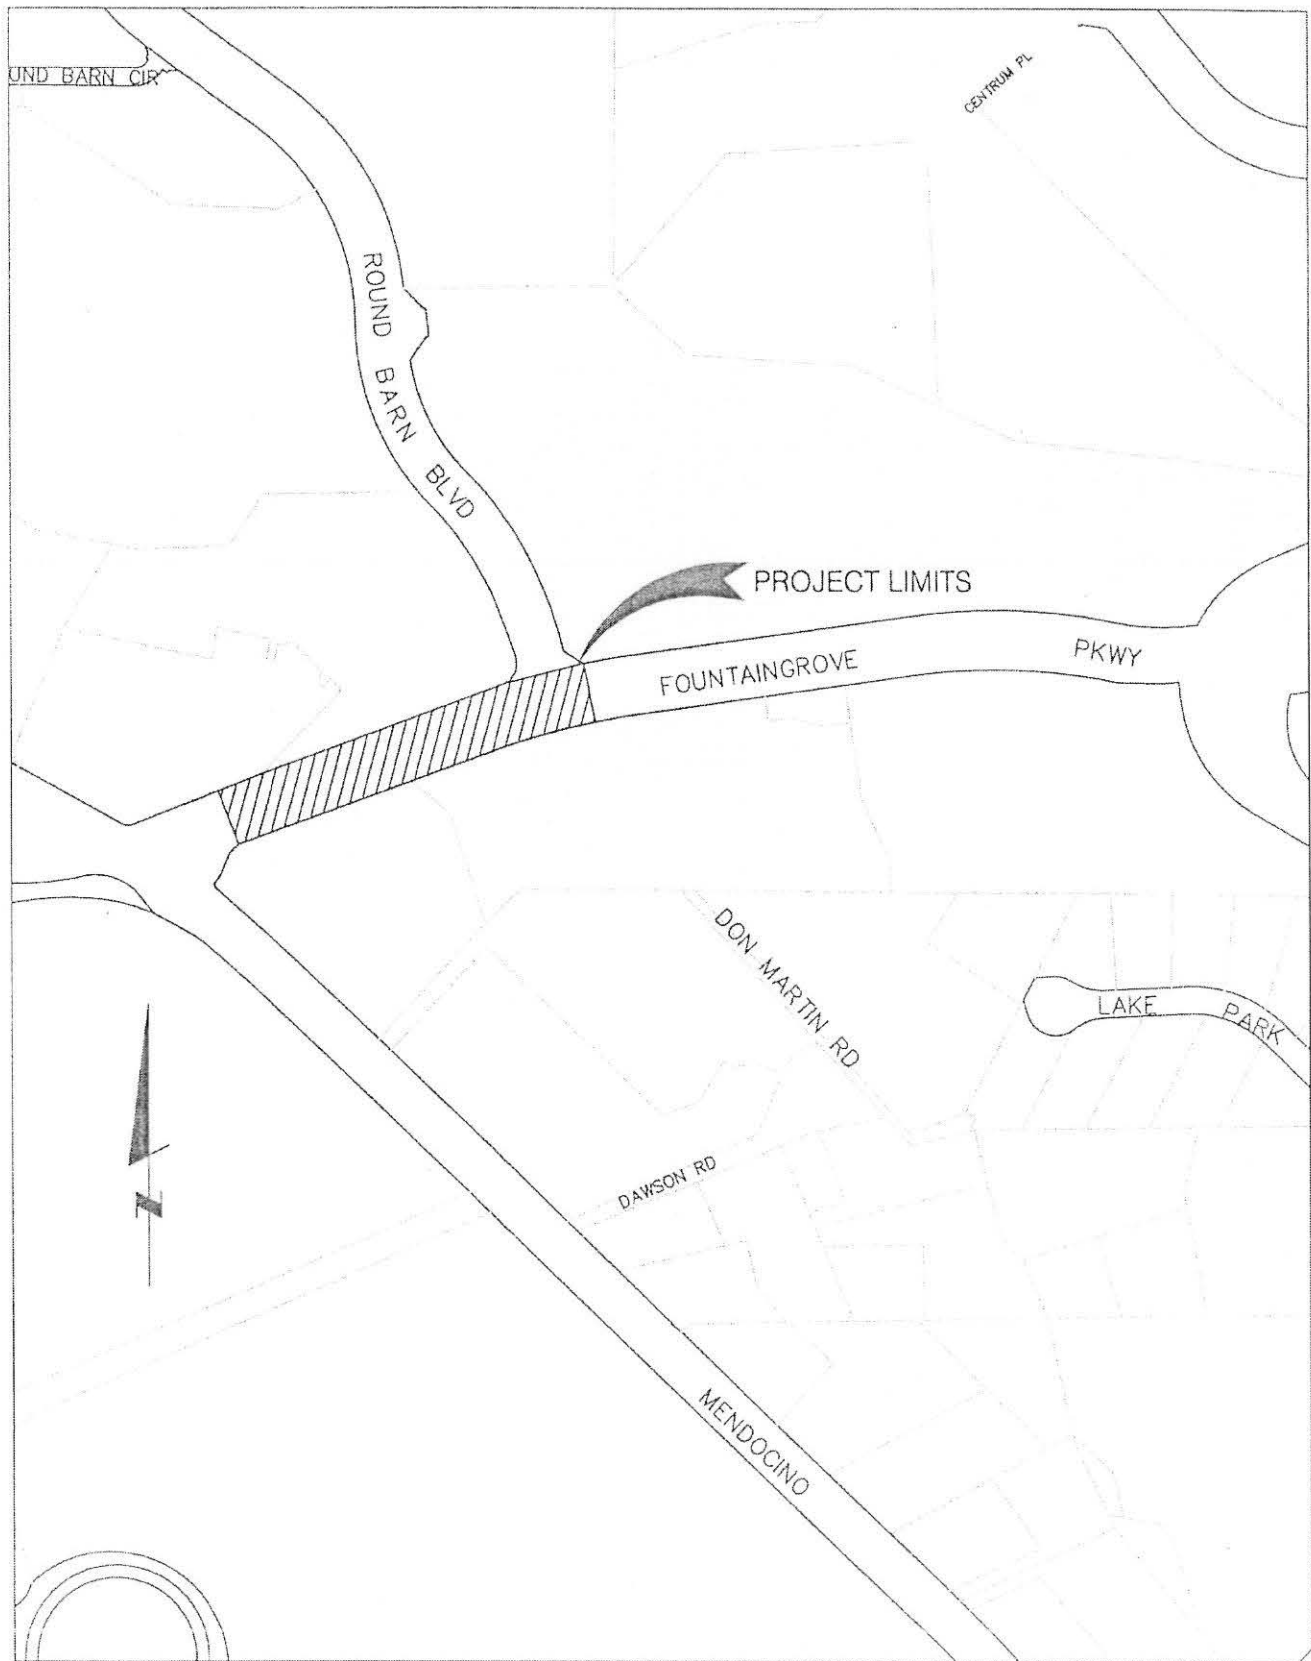

We will update you with another letter approximately two weeks prior to the start of construction. In addition to written communications like this, the City has a special website where you can track the progress of this project. Simply go to www.srcity.org/CIP, view the map, and click on the blue map pin that corresponds to this project. You can also view the list of all Capital Improvement Program projects and find this project under Project ID No: 01807.

Sincerely,

FRED BROWNE
Associate Engineer
