FARMERS LN WELL REHABILITATION PROJECT

Dear Residents:

The City of Santa Rosa is finalizing the plans for the Farmers Lane Well Rehabilitation project. Construction for the Well rehabilitation and upgrades is anticipated to begin in the October, 2017 and completed in May 2018. See reverse for Well locations.

The work to be completed for rehabilitating the wells includes replacing the existing pumps with a submersible pump at W4-1 and a vertical in-line pump at W4-2; installing new electrical service; and demolishing and rebuilding the buildings to house the new electrical components on-site.

We will work with the contractor to maintain access, parking and a clean work area throughout the construction.

Improvements to the wells are a high priority for the City of Santa Rosa's Capital Improvement Program (CIP). The completion of this CIP project will improve the reliability and output of the Farmers Lane Wells, which provide supplemental potable water for the City's businesses and residents.

Though temporary impacts to your neighborhood are inevitable, our goal is to improve our community infrastructure without creating any more disturbance than necessary. The Contractor will be advised that daily and weekly activities such as mail delivery and garbage service must continue during the project. Please feel free to contact me at 707-543-3878 (or e-mail at jtilles@srcity.org) if you have any questions or concerns.

We will update you with another letter approximately two weeks prior to the start of construction. In addition to written communications like this, the City has created a special website where you can track the progress of this project. Simply go to www.srcity.org/CIP, view the map, and click on the blue map pin that corresponds to this project. You can also view the list of all Capital Improvement Program projects and find this project under Project ID No: 01839.

Sincerely,

JILLIAN TILLES
Associate Civil Engineer
