SANTA ROSA COMPLETE STREETS ROAD DIET ON TRANSIT CORRIDOR

Dear Residents / Business Owners:

The City of Santa Rosa is contracting with Team Ghilotti, Inc for construction of the above-referenced project. Construction is expected to begin in August 2017 and last approximately 12 weeks. The primary construction will repave Third Street from 1,100 feet west of Dutton Avenue to the west side of the bridge over Santa Rosa Creek. The project will also include restriping Third Street to a single travel lane in each direction which will allow for a two-way center turn lane and Class-2 bicycle lanes to be provided without removing the street parking. The project striping will continue to provide two travel lanes in either direction at the intersection of Dutton Avenue and Third Street to avoid congestion at the traffic signal. There will also be upgrades to the curb ramps in these areas (see reverse for Project Limits).

Completion of this project is vital to the integrity of our community infrastructure. Some of the benefits this project will bring to your neighborhood include:

- Improve road surface.
- Improve accessibility by upgrading curb ramps.
- Improve bicycle safety by providing Class-2 bicycle lanes.
- Reduce the potential for rear end collisions by providing a center two-way turn lane as you are turning into your driveway or onto side streets.
- Reduce speeding.

Though temporary impacts to your neighborhood are inevitable, our goal is to improve our community infrastructure without creating any more disturbance than necessary. The construction contractor will be advised that daily and weekly activities such as mail delivery and garbage service must continue during the project. If you have special needs regarding access, or if you have any questions or concerns, please contact Lisa Welsh, Associate Civil Engineer by phone: (707)543-3909 or e-mail: LWelsh@srcity.org.

If you are aware of other occupants on your property who may not receive this notice, please share this notice with them or contact me with their address and I will notify them directly. In addition to written communications like this, the City has created a special website where you can track the progress of this project. Simply go to www.srcity.org/CIP, view the map, and click on the blue map pin that corresponds to this project. You can also view the list of all Capital Improvement Program projects and find this project under Project ID No: 01870.

The City values your feedback. Please tell us how we did in your neighborhood by completing a post-construction survey. The survey will be delivered by a City representative to homes and businesses in close proximity to the construction site upon completion of this project. You may also access the survey online at www.srcity.org/construction.

Sincerely,

LISA WELSH
Associate Civil Engineer
