SLATER STREET AND LEWROSA WAY SEWER REPLACEMENT PROJECT

CIP Project Number: C00189

Dear Residents:

The City of Santa Rosa is finalizing construction plans to replace the existing aged water and sewer mains with an 8" sewer and 8" water main on Slater Street and Lewrosa Way between Lewis Road and Dexter Street. After the water and sewer mains are replaced, the roadway will receive a complete reconstruction. As part of the project, the City will also be installing nine new ADA compliant curb ramps within the project area. The project is anticipated to start construction in September 2021 (see reverse for Project Limits).

Completion of this project is vital to the integrity of our community infrastructure. Some of the benefits include:

- Upgraded pipe materials to help improve the sewer and water system's performance.
- New sewer lines to (1) reduce the potential for blockages due to tree root intrusion and significantly reduce the need for repairs, and (2) reduce groundwater infiltration into the sewer system, which helps maintain the effectiveness of our Wastewater Treatment Plant.
- New water lines to help protect your home and property by improving water flows and pressure to fire hydrants.
- New roadway reconstruction; removing existing pavement and replacing with 0.55' full depth asphalt concrete.
- Improve accessibility by upgrading curb ramps at the intersections of Slater with Lewis Road, Lewrosa Way, Silva Avenue, and Dexter Street.

Though temporary impacts to your neighborhood are inevitable, our goal is to improve our community infrastructure without creating any more disturbance than necessary. The Contractor will be advised that daily and weekly activities such as mail delivery and garbage service must continue during the project. Please feel free to contact me at (707) 543-3866 (or e-mail at SMathews@srcity.org) if you have any questions or concerns.

We will update you with another letter approximately two weeks prior to the start of construction. In addition to written communications like this, the City has a special website where you can track the progress of this project. Simply go to www.srcity.org/CIP, view the map, and click on the blue map pin that corresponds to this project. You can also view the list of all Capital Improvement Program projects and find this project under Project ID No: 00189.

Sincerely,

SARA MATHEWS
Assistant Engineer
