LOS ALAMOS TRUNK REPLACEMENT SEGMENT 1 (STREAMSIDE DR TO ELAINE DR)

Dear Residents:

The City of Santa Rosa is contracting with Team Ghilotti Engineering Contractors for the construction of the above-referenced project. Construction will begin in Early Summer 2023 and last approximately 15 months. This project will replace approximately 5500 feet of the existing 15-inch diameter Los Alamos trunk sewer that was installed in the 1950s and is undersized and in poor condition. The new pipe will be 24-inch diameter PVC. It will generally be installed adjacent to the existing alignment. Relocation of small portions of the water main will be necessary in certain locations to create adequate separation from the proposed sewer line. In addition, water main improvements across Hwy 12 just east of Middle Rincon Rd will be necessary to install a new fire hydrant. Construction will begin at Streamside Drive and progress eastward to Elaine Dr.

To reduce impacts on traffic and businesses, proposed water improvements across HWY 12 are conditioned for Saturday and Sunday work (between 9 a.m. and 4 p.m.). In addition, the work on Mission Circle and across Mission Blvd will be performed at night between 8 PM and 5 AM. The construction work at night will produce typical construction equipment noise and is anticipated to last approximately one month, followed a couple of months later by paving work at night in the same area. The remainder of the work will occur during the day. As the work progresses to the east (during the day) along Quigg Drive, lane closures and detours will be required that will impact traffic so please allow more time for your trips. To facilitate construction sewer bypass pumping will be necessary at several locations along the alignment. We anticipate that each bypass pumping setup be in place for less than a week and will operate 24 hours per day while in place. The pumps/generators will be in sound enclosures to mitigate the noise. (see attached map for Project Limits).

Completion of this project is vital to the integrity of our community infrastructure. Replacement of this sewer trunk will reduce repairs, maintenance, infiltration, and inflow, and increase the capacity, all of which will reduce the risk of sewer overflows.

Though temporary impacts to your neighborhood are inevitable, our goal is to improve our community infrastructure without creating any more disturbance than necessary. The Contractor will be advised that daily and weekly activities such as mail delivery and garbage service must continue during the project. If you have special needs regarding access, if you are sensitive to noise and would like some ear plugs, or if you have any questions or concerns, please contact either the Construction Manager, onsite Project Inspector, or myself at one of the following numbers:

Adam Dagler, Coastland, Onsite Project Inspector	(707) 328-5734, cell
Mike Janet, Coastland, Consultant Construction Manager	(707) 494-6464, cell
Joe Moriera, Team Ghilotti Construction Manager	(707) 763-8700, office
Andrew Wilt, City Project Manager	(707) 543-3878, office

If you are aware of other occupants on your property who may not receive this notice, please share this notice with them or contact me with their address and I will notify them directly.

In addition to written communications like this, the City has a special website where you can track the progress of this project. Simply go to www.srcity.org/CIP, view the map, and click on the blue map pin that corresponds to this project. You can also view the list of all Capital Improvement Program projects and find this project under Project ID No: 01903.

Sincerely,

Andrew Wilt
