## SEWER MAIN LINING, MANHOLE AND LATERAL REHAB AT VARIOUS LOCATIONS 2016

Dear Residents, Business Owners, Property Managers and School District Employees:

The winter construction suspension has been removed and Insituform Technologies, LLC is now ready to start construction of the referenced project. As previously described, construction will involve rehabilitation of aged sewer mains and manholes in your area. The work will involve 'trenchless technology' in which new cured in place pipe is installed within the existing sewer mains. At specific locations, temporary above ground bypass pumping system will be installed to divert existing sewer flows while rehabilitation work is occurring. Portions of this bypass system will also be installed underground to accommodate traffic flow. Rehabilitation of aging sewer systems is a high priority for the City of Santa Rosa's Capital Improvement Program (CIP). The completion of these CIP projects is vital to the integrity of our infrastructure. Some of the benefits include:

- Improving sewer systems performance by rehabilitating pipe materials and manholes
- Improving sewer systems ability to meet community demands
- Reducing potential for sewer pipe blockages due to tree root intrusion
- Reducing the frequency of sewer maintenance
- Reducing groundwater infiltration into the sewer system, which helps with the effectiveness of our Wastewater Treatment Plant and, in turn, helps to protect our environment

We recognize this construction project will impact traffic and parking in your neighborhood to some degree and at different times throughout the course of construction. Regardless, the contractor will be advised that daily and weekly activities such as mail delivery and garbage service must continue during construction.

Construction will begin approximately April 2018 and last through September 2018. To the extent this is a multi-location project across the City, the timing for your area will be notified in an update. If you are aware of other occupants on your property who may not receive this notice, please share this notice with them or contact me with their address and I will notify them directly. Also for your convenience, this and additional information regarding the project is available at the City's interactive webpage [www.srcity.org/CIP](http://www.srcity.org/CIP), reference 'Project ID 01944'.

If you have special needs regarding access, or if you have any questions, comments, or other concerns - now or during construction - please contact the Construction Inspector, Construction Manager or me at the following numbers in the order listed:

DeWayne White, Consultant Project Inspector  
Mike Janet, Consultant Construction Manager  
Cy Penry, City Project Manager

(707) 688-2534, Mobile  
(707) 571-8005, Office
