EMERGENCY WELL PUMP STATION- A PLACE TO PLAY PARK – PROJECT ID NO: 1965

Dear Residents:

The City of Santa Rosa is finalizing construction plans to convert the existing test well at A Place to Play Park into an emergency groundwater well and pump station. This conversion will assist in meeting water supply demands for the City of Santa Rosa in the event of a disaster or disconnection from the Sonoma County Water Agency system. Water may be produced for up to 15 days on an annual basis per the State Division of Drinking Water classification as a Standby well.

The existing test well was installed in 2006. The conversion includes installing a submersible pump and piping to tie the well into the existing water and sewer system, which will be housed in a new concrete masonry building. The site, approximately 90 feet by 90 feet, will be paved and secured with an 8-foot fence.

The project is anticipated to take approximately 12 MONTHS with an estimated start date of JUNE 2020 (see reverse for Project Limits).

Completion of this project is vital to the integrity of our community infrastructure. Some of the benefits this project will bring to the City include:

- Additional water supply to meet demands during the event of an emergency or disconnection from the Sonoma County Water Agency system.
- Upgraded pipe materials to help improve the sewer and water system's performance.

The project has been designed to have minimum impact on future improvements at A Place to Play Park. Though temporary impacts during construction are inevitable, our goal is to improve our community infrastructure without creating any more disturbance than necessary. Please feel free to contact me at 707-543-3847 (or e-mail at erauber@srcity.org) if you have any questions or concerns.

We will update you with another letter approximately two weeks prior to the start of construction. In addition to written communications like this, the City has a special website where you can track the progress of this project. Simply go to www.srcity.org/CIP, view the map, and click on the blue map pin that corresponds to this project. You can also view the list of all Capital Improvement Program projects and find this project under Project ID No: 01965.

Sincerely,

J. ERICH RAUBER, P.E., G.E.
Supervising Engineer
