## **FULTON RD SEWER MAIN IMPROVEMENTS WEST 3RD ST TO SANTA ROSA CREEK**

Dear Residents:

The City of Santa Rosa is finalizing construction plans to replace approximately 650 feet of failing sewer pipe that was installed under Santa Rosa Creek west of the Fulton Road Bridge in 1969. The sewer was originally constructed using 18-inch diameter asbestos cement pipe (ACP) to serve a significant geographical area. However, due to construction of other nearby regional collection facilities, it now serves a relatively small area of only approximately 60 homes located in the Countryside subdivision southwest of Fulton Road and Santa Rosa Creek. The sewer has become partially obstructed and needs to be replaced. The project would include use of open trench construction methods to construct a replacement 8-inch diameter gravity flow sewer under Santa Rosa Creek. The project is anticipated to take **4 TO 6 MONTHS** to complete with an estimated start date of spring **2025** (see reverse for Project Limits).

Though temporary impacts to your neighborhood are inevitable, our goal is to improve our community infrastructure without creating any more disturbance than necessary. The Contractor will be advised that daily and weekly activities such as mail delivery and garbage service must continue during the project. Please feel free to contact me at (707)543-3878 (or e-mail at [awilt@srcity.org](mailto:awilt@srcity.org)) if you have any questions or concerns.

We will update you with another letter approximately two weeks prior to the start of construction. In addition to written communications like this, the City has a special website where you can track the progress of this project. Simply go to [www.srcity.org/CIP](http://www.srcity.org/CIP), view the map, and click on the blue map pin that corresponds to this project. You can also view the list of all Capital Improvement Program projects and find this project under Project ID No: 02117.

Sincerely,

*Andrew Wilt*
