BICYCLE AND PEDESTRIAN GAP CLOSURES - PINER ROAD AND N DUTTON AVENUE

Dear Residents:

The City of Santa Rosa is finalizing construction plans at two locations. The first location will rehabilitate the outside lanes of pavement and provide Class II bicycle lanes on Piner Road between Coffey Lane and Range Avenue. The second location will provide a sidewalk on the east side of Dutton Avenue just south of Jennings Avenue. Both locations will include upgrading the curb ramps to current ADA compliant standards. The project locations were selected as part of the first phase of recommended projects in the Bicycle and Pedestrian Master Plan Update 2018. The project is funded by SB1 'gas tax' funding. The project is anticipated to take 4 months, with an estimated start date of Summer 2019 (see reverse for Project Limits).

Completion of this project is vital to the integrity of our community infrastructure. Some of the benefits this project will bring to your neighborhood include:

- Provides Class II bike lanes completing the existing gap on Piner Road between Coffey Lane and Range Avenue
- Installation of eleven (11) ADA compliant curb ramp upgrades for improved accessibility

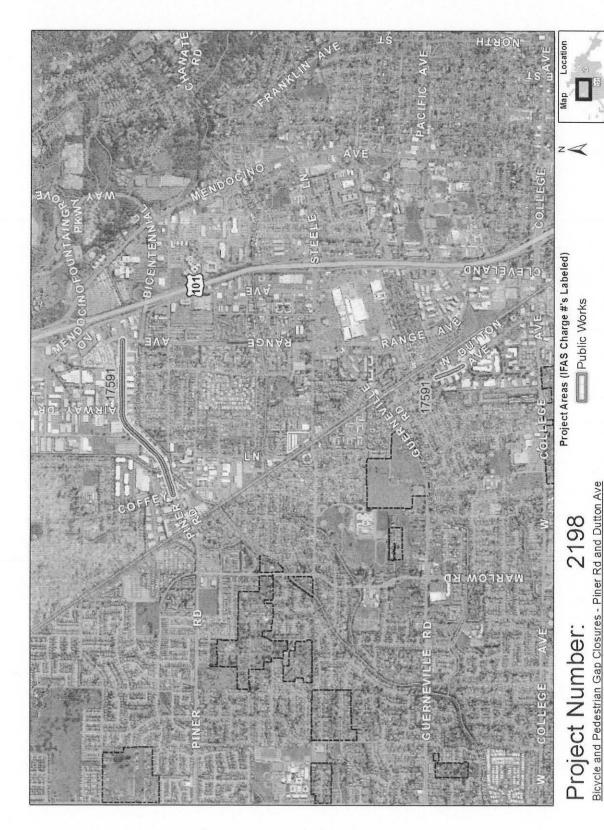

Though temporary impacts to your neighborhood are inevitable, our goal is to improve our community infrastructure without creating any more disturbance than necessary. The Contractor will be advised that daily and weekly activities such as mail delivery and garbage service must continue during the project. Please feel free to contact me at (707)543-3909 (or e-mail at LWelsh@srcity.org) if you have any questions or concerns.

We will update you with another letter approximately two weeks prior to the start of construction. In addition to written communications like this, the City has created a special website where you can track the progress of this project. Simply go to www.srcity.org/CIP, view the map, and click on the blue map pin that corresponds to this project. You can also view the list of all Capital Improvement Program projects and find this project under Project ID No: 02198.

Sincerely,

LISA WELSH

Associate Civil Engineer
