BICYCLE AND PEDESTRIAN GAP CLOSURES - PINER ROAD AND N DUTTON AVENUE

Dear Residents/Business Owners:

The City of Santa Rosa is contracting with Ghilotti Construction Company for construction of the above referenced project. Construction will begin in December 2019 and last approximately 18 weeks. The first location will rehabilitate the outside lanes of pavement and provide Class II bicycle lanes on Piner Road between Coffey Lane and Range Avenue. The second location will provide a sidewalk on the east side of Dutton Avenue just south of Jennings Avenue. Both locations will include upgrading the curb ramps to current ADA compliant standards. The project locations were selected as part of the first phase of recommended projects in the Bicycle and Pedestrian Master Plan Update 2018. The project is funded by SB1 'gas tax' funding. (see reverse for Project Limits).

Completion of this project is vital to the integrity of our community infrastructure. Some of the benefits this project will bring to your neighborhood include:

- **Provides Class II bike lanes completing the existing gap on Piner Road between Coffey Lane and Range Avenue**
- **Installation of eleven (11) ADA compliant curb ramp upgrades for improved accessibility**

Though temporary impacts to your neighborhood are inevitable, our goal is to improve our community infrastructure without creating any more disturbance than necessary. The Contractor will be advised that daily and weekly activities such as mail delivery and garbage service must continue during the project. If you have special needs regarding access, or if you have any questions or concerns, please contact the Construction Manager or me at the following numbers:

Mike Janet, Construction Manager
Lisa Welsh, City Project Manager

(707) 571-8005, Office
(707) 543-3909, Office

If you are aware of other occupants on your property who may not receive this notice, please share this notice with them or contact me with their address and I will notify them directly.

Night work is expected for this project for a limited time for some of the paving operations; work during overnight hours is to reduce the impact to traffic and businesses during paving work. In addition to written communications like this, the City has created a special website where you can track the progress of this project. Simply go to www.srcity.org/CIP, view the map, and click on the blue map pin that corresponds to this project. You can also view the list of all Capital Improvement Program projects and find this project under **Project ID No: 02198**. The City values your feedback. Please tell us how we did in your neighborhood by completing a post-construction survey. The survey will be delivered by a City representative to homes and businesses in close proximity to the construction site upon completion of this project. You may also access the survey online at www.srcity.org/construction.

Sincerely,

Lisa Welsh
Associate Civil Engineer
