REPLACEMENT OF WATER SERVICES AFFECTED BY THE TUBBS FIRE

Dear Residents:

The City of Santa Rosa is finalizing construction plans to remove and replace the water services damaged by the Tubbs Fire as identified by a Water Quality investigation conducted by the City's Water Department. This contract will replace the City-owned portion of the water service, from the water main to the water meter, with new 1-inch Polyvinyl Copper Services. The project is anticipated to take 60 working days with an estimated start date of early June 2018.

Completion of this project is vital to protecting the integrity of our community infrastructure and maintaining health and safety standards. Once the brand-new water service is installed, a water quality sample will be taken by the Water department to ensure that the contamination has been removed after the work is complete.

Please feel free to contact me at (707) 543-3878 (or e-mail at jtilles@srcity.org), if you have any questions or concerns regarding the work.

For more information about the water quality advisory and the latest sampling data, visit srcity.org/WQAdvisory and for specific questions about your water quality, please call our Water Quality hotline at (707) 543-3965.

We will update you with another letter approximately two weeks prior to the start of construction. In addition to written communications like this, the City has a special website where you can track the progress of this project. Simply go to www.srcity.org/CIP, view the map, and click on the blue map pin that corresponds to this project. You can also view the list of all Capital Improvement Program projects and find this project under Project ID No: 02213.

Sincerely,

JILLIAN TILLES
Associate Civil Engineer
