**GEYSERS PIPELINE EXPANSION JOINTS REPLACEMENT**  
**Project ID No: 02243**

Dear Resident:

The City of Santa Rosa is finalizing construction plans to implement the Geysers Pipeline Expansion Joints Replacement project. The project will consist of replacing 5 expansion joints in the geysers pipeline between Bear Canyon and Mayacamas pump stations on Pine Flat Road. The project's anticipated start date is August 2020 and will take approximately 8 weeks to complete (see reverse for Project Limits).

Completion of this project is vital to the integrity of our community infrastructure. It will ensure that treated wastewater the pipeline conveys will continue to allow clean power to be generated by Calpine in the Geysers geothermal region.

Though temporary impacts are inevitable, our goal is to improve our community infrastructure without creating any more disturbance than necessary. Pipeline maintenance activities can only be performed once a year during a 30-day shutdown window and in order to complete this work, it may be necessary at times for the contractor to work 24-hours a day, 7 days a week. During joint replacement and roadway rehabilitation, short term roadway closures of up to 8 hours at a time may be required.

The Contractor will be advised that daily and weekly activities such as mail delivery and garbage service must continue during the project. Please feel free to contact me at (707) 543-3847 (or e-mail at [ERauber@srcity.org](mailto:ERauber@srcity.org)) if you have any questions or concerns.

We will update you with another letter approximately two weeks prior to the start of construction. In addition to written communications like this, the City has a special website where you can track the progress of this project. Simply go to [www.srcity.org/CIP](http://www.srcity.org/CIP), view the map, and click on the blue map pin that corresponds to this project. You can also view the list of all Capital Improvement Program projects and find this project under Project ID No: 02243.

Sincerely,

J. ERICH RAUBER, P.E., G.E.  
Supervising Engineer
