GEYSERS PIPELINE EXPANSION JOINTS REPLACEMENT
Project ID No: 02243

Dear Resident:

The City of Santa Rosa and Piazza Construction are preparing to resume construction activities on the Geysers Pipeline Expansion Joints Replacement project that was delayed in August 2020. This project will replace 5 expansion joints in the geysers pipeline between Bear Canyon and Mayacamas pump stations on Pine Flat Road (see reverse for Project Limits). This notification is to inform you the project will now begin in mid-April 2021, and is anticipated to last approximately 10 weeks, with construction activities concluding in June 2021.

Roadway access restrictions will also begin in mid-April 2021, and last through the duration of the project. When they are in place, roadway closures may be required resulting in traffic delays of up to one-half hour. Piazza Construction will maintain a single lane through the construction zone on Pine Flat Road as much as possible.

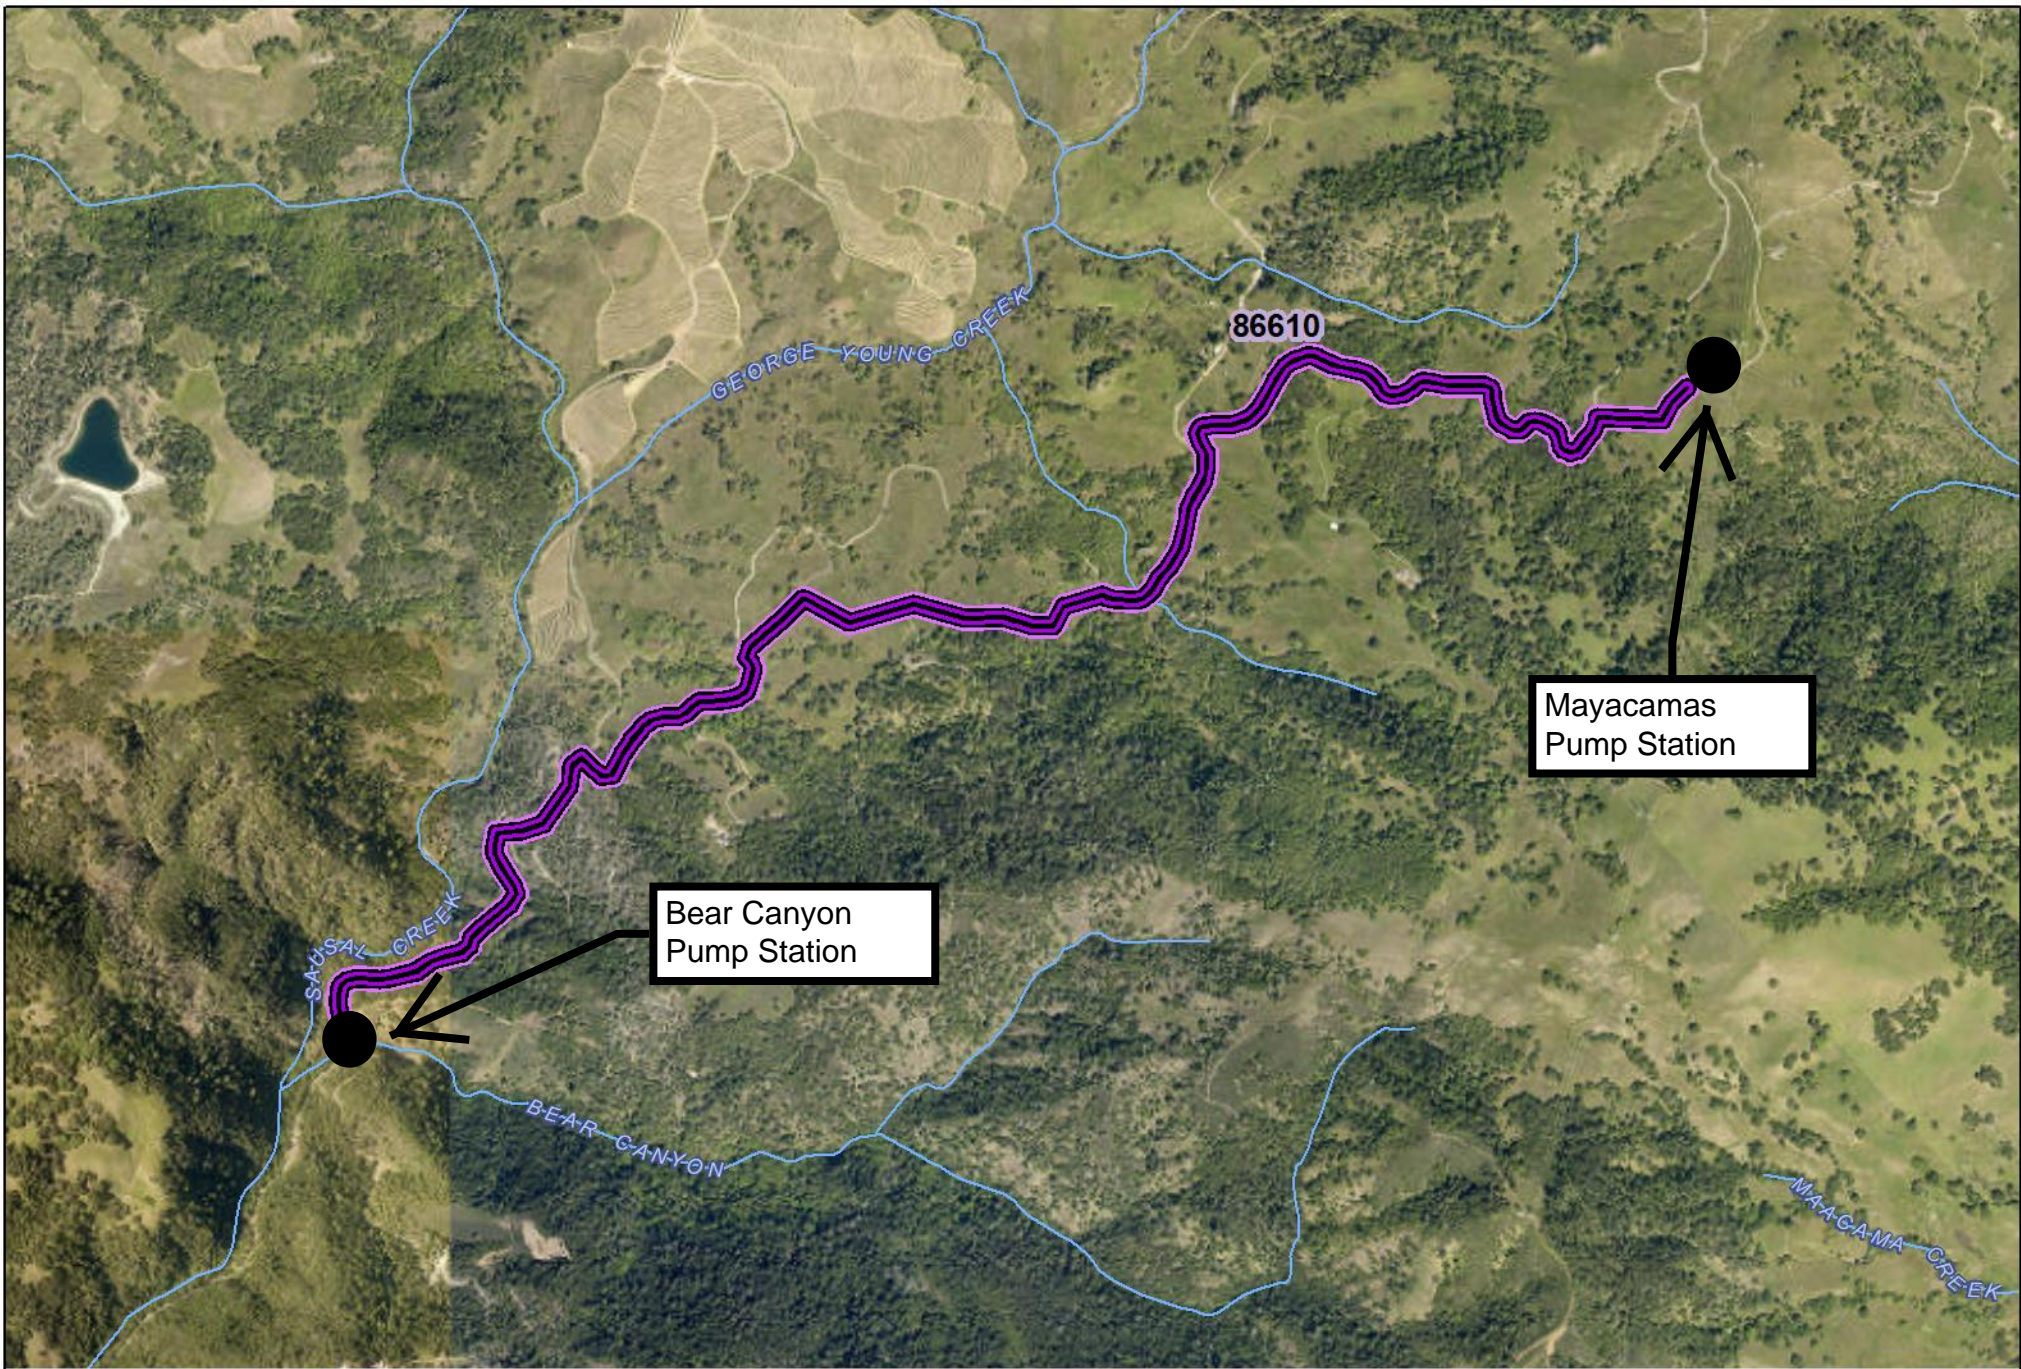

Completion of this project is vital to the integrity of our community infrastructure. It will ensure that treated wastewater the pipeline conveys will continue to allow clean power to be generated by Calpine in the Geysers geothermal region.

Piazza Construction has been advised that daily and weekly activities such as mail delivery and garbage service must continue during the project. Please feel free to contact me at (707) 543-3847 (or e-mail at ERauber@srcity.org) if you have any questions or concerns.

We will update you with another letter approximately two weeks prior to the start of construction. In addition to written communications like this, the City has a special website where you can track the progress of this project. Simply go to www.srcity.org/CIP, view the map, and click on the blue map pin that corresponds to this project. You can also view the list of all Capital Improvement Program projects and find this project under Project ID No: 02243.

Sincerely,

J. ERICH RAUBER, P.E., G.E.
Supervising Engineer
