**ANNUAL SLURRY SEAL 2020
CONTRACT NO. C02318**

Residents/Property Owner:

The City of Santa Rosa has contracted with DRYCO Construction, Inc., to apply slurry seal to selected City streets. Slurry seal is a preventive maintenance application that restores the surface of the roadway and extends the overall life of the pavement. It consists of a thin coat of mixed asphalt emulsion and aggregate. Prior to slurry application, roadway cracks are filled, and areas of failed asphalt in the roadway are repaired by City personnel. For more information on this year's slurry seal locations, schedule and the City's Pavement Management Program, please go to www.srcity.org/slurryseal.

Slurry seal application will start August 31, 2020, and will complete on September 11, 2020. Please see the enclosed map with streets color coded according to slurry date. Many streets in your neighborhood will have **No Parking** signs posted near the street. Please make sure to only park on streets that are not part of the daily project area. All No Parking signs will be dated with the applicable date for the street they are posted on. It is vital for everyone's safety that you **DO NOT** drive, walk (including your pets) or bicycle on newly applied slurry until the streets have been re-opened by City staff.

Three days prior to the slurry seal application, City personnel will knock on the door of each affected residence and distribute a flyer with information about parking restrictions and dates. If you are not home, they will leave the flyer on your door. Resident safety and preventing the spread of COVID-19 is of the utmost importance to the City. As we resume construction projects that serve our community, I want to assure you that all City staff involved in distributing project notifications will be following required health and safety practices as stated in the Sonoma County Health Officer's Order.

For general questions please call the Transportation and Public Works Department at (707) 543-3800. For more specific questions or if you feel you have any special access needs for your home or business during construction or for any other questions or concerns, you can contact me by phone at (707) 543-4508 or e-mail at gbailey@srcity.org.

The City values your feedback. Please tell us how we did in your neighborhood by completing a post-construction survey. The survey will be delivered by a City representative to homes and businesses in close proximity to the construction site upon completion of this project. You may also access the survey online at www.srcity.org/construction.

Sincerely,

GRANT BAILEY, P.E.
Associate Civil Engineer
