PUBLIC SAFETY BUILDING HYDRONIC PIPELINE REPLACEMENT

Dear Residents:

The City of Santa Rosa is finalizing construction plans to replace the Public Safety Building (PSB) (955 & 965 Sonoma Ave) hot and cold water supply and return lines for the building's hydronic boiler system. The project is anticipated to be contained within the City parcel limits with potential impacts to Sonoma Avenue due to construction activities affecting the building's parking lot (see reverse for Project Limits). The project duration is estimated at 2-3 months, with an estimated start date of August 22, 2022.

Completion of this project is vital to the integrity of our community infrastructure. The project will update the Public Safety Building's HVAC infrastructure used by our emergency response personnel.

Though temporary impacts to your neighborhood are inevitable, our goal is to improve our community infrastructure without creating any more disturbance than necessary. The Contractor will not conduct any activities that generate noise outside of 8:00 am to 5:00 pm, Monday-Friday. The Contractor will be advised that daily and weekly activities such as mail delivery and garbage service must continue during the project. Please feel free to contact me at (707) 543-3914 (or e-mail at cbalanesi@srcity.org) if you have any questions or concerns.

We will update you with another letter approximately two weeks prior to the start of construction. In addition to written communications like this, the City has created a special website where you can track the progress of this project. Simply go to www.srcity.org/CIP, view the map, and click on the blue map pin that corresponds to this project. You can also view the list of all Capital Improvement Program projects and find this project under Project ID No: 02388.

Sincerely,

CHRIS BALANESI
Assistant Engineer
