**FOUNTAINGROVE PKWY PUMP STATION 3 TO RESERVOIR 3 TELEMETRY
CONTRACT NO. C02469**

Dear Residents,

The City of Santa Rosa is finalizing construction plans for the installation of a 2" conduit and telemetry line along Fountaingrove Pkwy connecting Pump Station 3 on Thomas Lake Harris Drive and Reservoir 3 on Fir Ridge Drive. Construction is anticipated to start in Summer 2024, and is expected to take 25 working days to complete, weather permitting.

Many of the benefits this project will provide include:

- Additional protection for the communications line between Reservoir 3 and Pump Station 3
- Facilitate future maintenance and repair operations without necessitating disruptive excavation
- Maintaining a reliable connection to ensure the availability of sufficient water levels for the area

Although temporary impacts are inevitable, our goal is to improve our community without creating any more disturbance than necessary. The Contractor will provide adequate notices to lane closures and alternative routes as necessary. Please feel free to contact me at (707) 543-3864 (or e-mail at FOng@srcity.org), should you have any questions or concerns.

We will update you with another letter approximately two weeks prior to the start of construction. In addition to written communications like this, the City has a special website where you can track the progress of this project. Simply go to www.srcity.org/CIP, view the map, and click on the blue map pin that corresponds to this project. You can also view the list of all Capital Improvement Program projects and find this project under Project ID No: 02469.

Sincerely,

Felicia Ong
