LA PALOMA AVE / EAST HAVEN DR / ROGERS WY SEWER AND WATER MAIN REPLACEMENT

Dear Residents:

The City of Santa Rosa is finalizing construction plans to replace the existing sanitary sewer and water main in East Haven Dr from 4th St to Eleanor Ave, La Paloma Ave from Rogers Way to East Haven Dr, and in Rogers Way from 4th St to La Paloma Ave. Curb ramps in the project area will be replaced and existing roads will be reconstructed. The project is anticipated to take 5 months with an estimated start date of June, 2020 (see reverse for Project Limits).

Completion of this project is vital to the integrity of our community infrastructure. Some of the benefits this project will bring to your neighborhood include:

- Upgraded pipe materials to help improve the sewer and water system's performance.
- New sewer lines to (1) reduce the potential for blockages due to tree root intrusion and significantly reduce the need for repairs, and (2) reduce groundwater infiltration into the sewer system, which helps maintain the effectiveness of our Wastewater Treatment Plant.
- New water lines to help protect your home and property by improving water flows and pressure to fire hydrants.
- The roadway will be reconstructed, and the new pedestrian ramps will be installed within the limits of the project.

Though temporary impacts to your neighborhood are inevitable, our goal is to improve our community infrastructure without creating any more disturbance than necessary. The Contractor will be advised that daily and weekly activities such as mail delivery and garbage service must continue during the project. Please feel free to contact me at (707)543-4508 (or e-mail at gbailey@srcity.org) if you have any questions or concerns.

We will update you with another letter approximately two weeks prior to the start of construction. In addition to written communications like this, the City has a special website where you can track the progress of this project. Simply go to www.srcity.org/CIP, view the map, and click on the blue map pin that corresponds to this project. You can also view the list of all Capital Improvement Program projects and find this project under Project ID No: 0308.

Sincerely,

GRANT BAILEY, P.E.
Associate Civil Engineer
