FOLEY AVE SEWER IMPROVEMENTS

Dear Residents:

The City of Santa Rosa is finalizing construction plans to upsize the existing 6" sewer main in Foley Ave to an 8" main, as well as redirect flows from the Old Town trunk to Cleveland Ave. Water service improvements will be required, including the installation of 2 new commercial Fire Hydrants. There will be a full road reconstruction. The project is anticipated to take 8 weeks with an estimated start date of January 2017 (see reverse for Project Limits).

Completion of this project is vital to the integrity of our community infrastructure. Some of the benefits this project will bring to your neighborhood include:

- Upgraded pipe materials to help improve the sewer and water system's performance.
- New sewer lines to (1) reduce the potential for blockages due to tree root intrusion and significantly reduce the need for repairs, and (2) reduce groundwater infiltration into the sewer system, which helps maintain the effectiveness of our Wastewater Treatment Plant.
- New water service lines and fire hydrants to help protect your property.
- New street surface with a full road reconstruction.

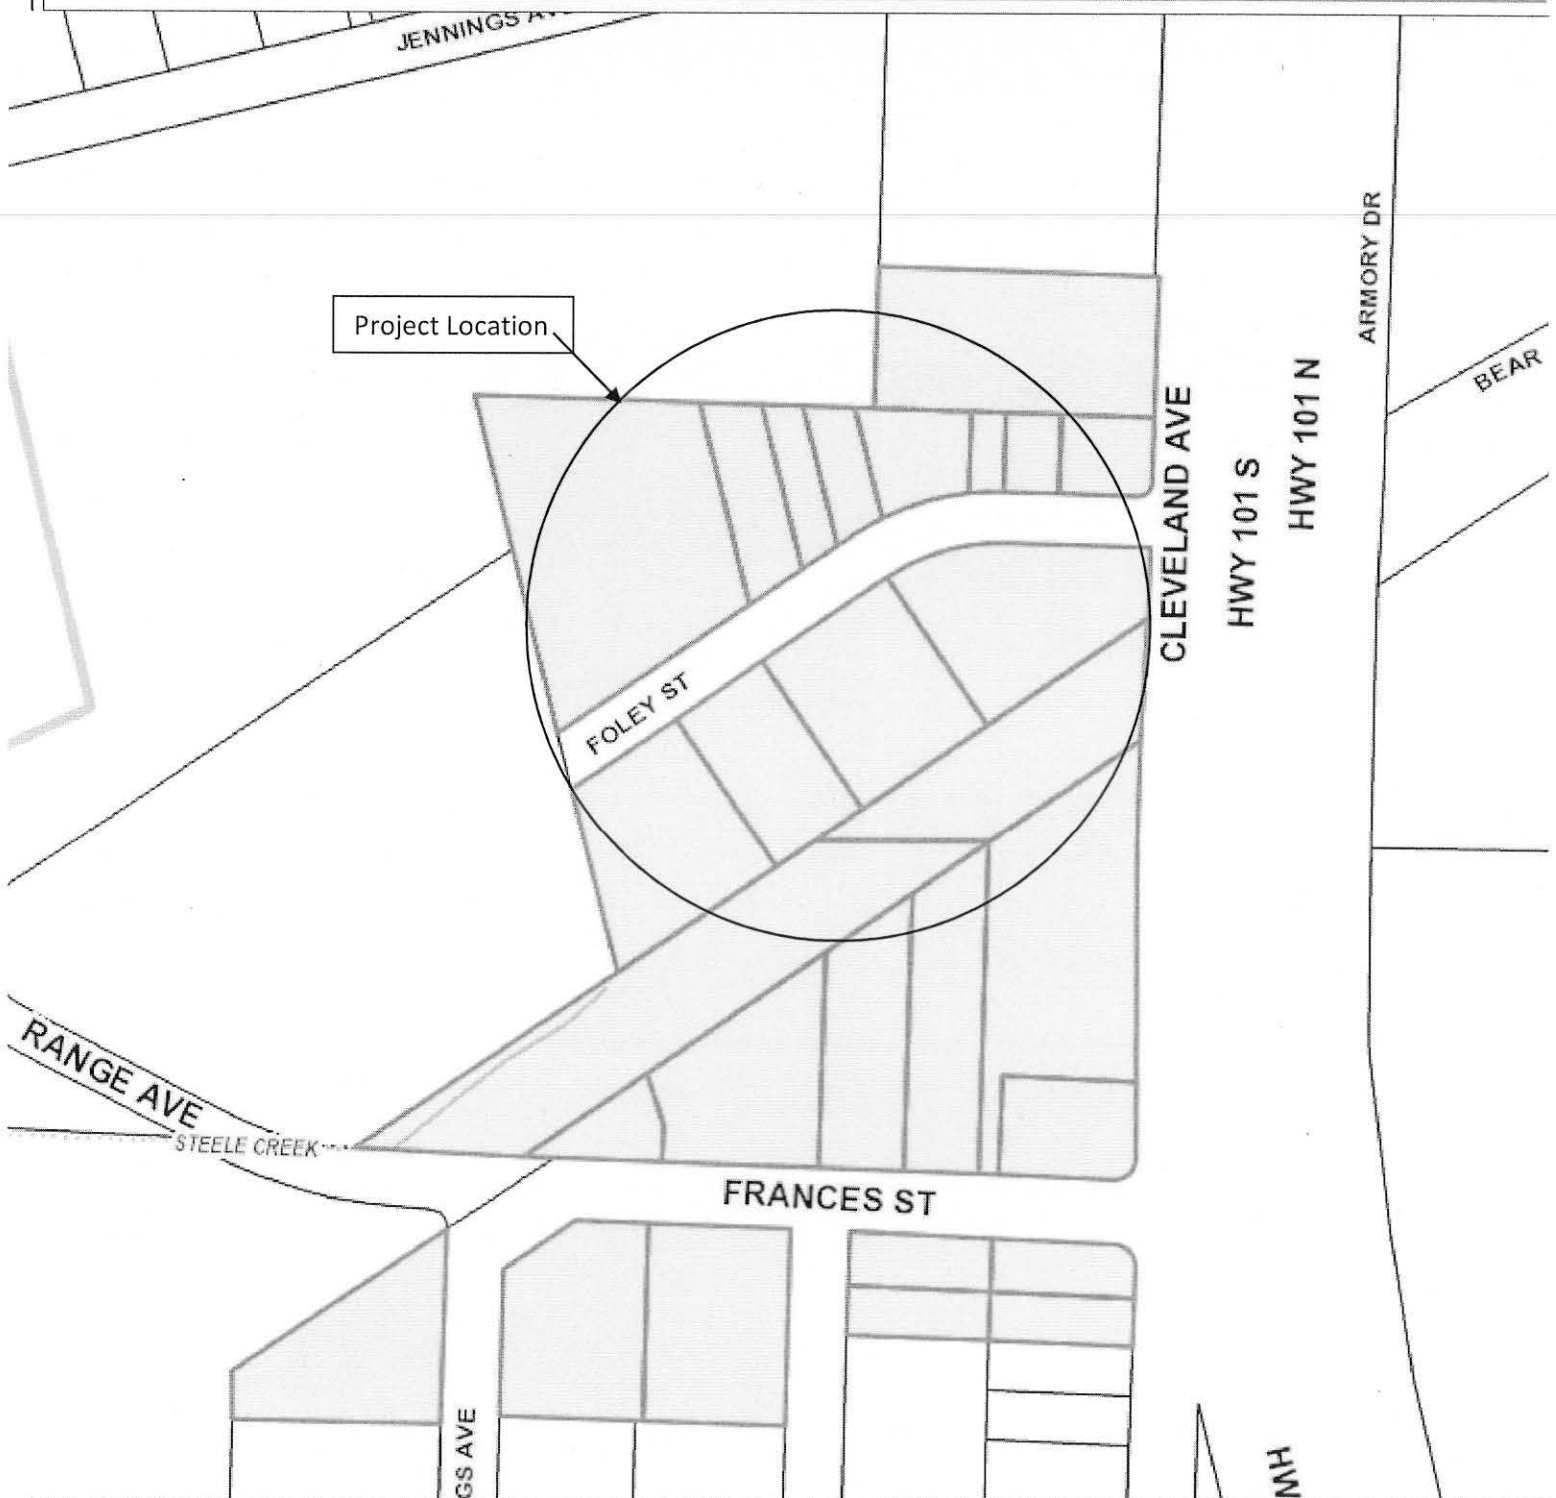

Though temporary impacts to your neighborhood are inevitable, our goal is to improve our community infrastructure without creating any more disturbance than necessary. The Contractor will be advised that daily and weekly activities such as mail delivery and garbage service must continue during the project. Please feel free to contact me at (707) 543-4291 or aallen@srcity.org if you have any questions or concerns.

We will update you with another letter approximately two weeks prior to the start of construction. In addition to written communications like this, the City has a special website where you can track the progress of this project. Simply go to www.srcity.org/CIP, view the map, and click on the blue map pin that corresponds to this project. You can also view the list of all Capital Improvement Program projects and find this project under Project ID No: 00468.

Sincerely,

ANDREW ALLEN
Supervising Engineer
